v. A.CIG.117

EN INSTRUCTION AND INFORMATION FOR THE USERS
Manufacturer: RAW-POL Stefański S.K.A., Julianów 50, 96-200 Julianów, Poland.
This product belongs to the Personal Protective Equipment (PPE), defined in the Regulation (EU) 2016/425 of the European Parliament and of the Council and meets the guidelines of that regulation and the PPE Regulation 2016/425 as brought into UK Law and amended. It was classified to category I – only for the minimal risks.

Standards: EN ISO 21420:2020 “Protective gloves – General requirements and test methods”; Internal technical specification of the manufacturer: RS21301:2018, RS21302:2018, RS21303:2018.

Product/description: Protective gloves. Detailed characteristics of the product is provided at the address: rawpol.com
Intended use: This product is a personal protection equipment which protects against the minimal risks such as: superficial mechanical injury that do not need medical attention, e.g. scratches resulting from bumping into fixed obstacles and gardening; contact with hot surfaces not exceeding 50°C (the time of exposure to the contact with hot surfaces during the test was 30 seconds); atmospheric conditions that are not of an extreme nature, i.e. cool temperature higher than -5°C at medium work intensity. Working time depends on many factors, such as wind strength or individual user's characteristics or work environment, so it is not possible to specify it precisely. More information about the conditions in which the tests were conducted can be obtained at rawpol.com or directly from a manufacturer, an authorized representative or an authorized distributor. Skill by EN ISO 21420:2020 – the level of effectiveness (from 1 to 5): 3. The level of protection was obtained on the basis of tests carried out according to conditions described in the norms/specifications to which they apply (the conditions do not necessarily reflect actual conditions in the workplace). The product provides protection against the above risks and it is intended for use in the environments in which they occur. Please always carry out a risk assessment in a given work environment to verify whether the product provides protection against all risks available in this environment and to evaluate which additional PPE should be used with the gloves to ensure an optimal level of protection.

Limitations: Do not use the product other than in accordance with the intended purpose, recommendations in the instruction, in average conditions and high-risk (for which it is appropriate to apply measures to protect individual category II and III) and when there is a risk that the product may be caught by moving objects, e.g. moving parts of machinery. This product does not protect parts of the body, which it does not cover.

Use and handling: The personal responsibility of the user ensures the protective function of the product. Be careful when choosing, it needs to lay back and provide freedom of movement. Remember to wear gloves on clean hands. To put on the glove, grasp its wrist part, slide the glove on the opposite hand and stretch it over the palm of your hand. Do the same with the second glove. Before use please fasten and adjust any fasteners or adjustments, if they are, and after use, unfasten or loosen them allowing free removal of the glove. To remove the glove, grasp the part covering the fingertips with one hand and pull it off. Repeat with the second glove. If the product is worn together with the protective clothing against special threats, the total protection features depending on the destination need to be guaranteed. In any case the requirements take precedence. Before every use, check on your responsibility condition of the glove and whether the product is suitable for working activities, complete all the protective functions and check it for damage, which could have a negative impact on the safety functions (e.g. cracks, holes, ripped seams, broken fasteners, abrasions, colour change). If there is such a negative impact, before use, restore the original, valid state of the product (for this purpose please contact with safety expert, the manufacturer or the authorized representative of the manufacturer), and if this is not possible, replace it. During work, pay attention to the behaviour of the protective functions. The loss of the protective properties means that the product has been used. Do not use a damaged or worn out product. The product does not have additional equipment and spare parts.

The materials, from which the product is made, should not impair user health or hygiene, if the user is not allergic to any material that is part of the gloves. Remember that substances contained in the product's materials or are a component of the product can be an allergen, e.g. cotton, leather, metal elements, latex, natural rubber, dyes, etc. Particularly sensitive persons should prior to use test the product or consult a doctor.

Size: The product should be of sufficient size, which should be fitted by trying on before starting work. Product size is given on the inside tab or directly on the product or on the unitary packaging. The available size range is given in the SIZES box. Glove size tables defined on the basis of the length and circumference of the hand can be obtained at rawpol.com. In the case of gloves for which the letter size definition system is used, the individual sizes correspond to the digital system according to the scheme: XS-6, S-7, M-8, L-9, XL-10, XXL-11.

Cleaning, maintenance, and disinfection: The cleaning by the available cleaning agents (soft brushes, damp cloths or by shaking etc.) is recommended. Do not wash gloves and use any maintenance and disinfection agents, because it can cause the decreasing of their protective level. In order to increase the hygiene of work, gloves should be worn on clean hands. For hygiene reasons, gloves that are sweaty should be replaced with new ones.

Storage: The product should be stored at the appropriate temperature, in dry and well ventilated place. Too high humidity, air, too high or low temperature or intense light can adversely impact the product quality. Manufacturer accepts no liability for the quality of the product stored contrary to the instructions. This may result in a lowering of the gloves protection level.

Type of packaging: It is recommended to distribute (including transport) of this product in the cardboard or foil package. Loading, transport and unloading should take place in conditions protecting against getting wet, dirty and damaged.

Shelf life can be estimated on the basis of the product use and tear. Considering various use intensities and environmental factors, such as sunlight, rain, etc., it is not possible to provide a precise span. The product retains its protective properties up to the moment of a damage which cannot be repaired without decreasing its protective level. Occurrence of mechanical damages means that the product should be repaired or immediately withdrawn from use. With proper warehousing the storage time of the product can be up to 6 years from the date of production (for gloves which contain polyurethane up to 3 years). Storage will not significantly change the glove's characteristics during the period indicated above, if the storage conditions comply with the requirements of these instructions. Special storage conditions are not required.

Date of production is given on a collective packaging or on a product. It is shown along with the lot number, e.g., **290120251234**; explanation: the third and fourth digit refer to the month of production, and the consecutive four digits represent the year of production. The other digits, together with the above mentioned, identify the lot number.

The access to the EU declaration of conformity can be accessed at support.rawpol.com.

In case this instruction becomes invalid due to the changing law or other factors, new version should be downloaded. Valid instructions are available on the website rawpol.com or support.rawpol.com. This instruction is marked with the version number A.CIG.117, where A.CIG indicates the item and the identification number in the smallest packaging quantity in a cardboard box packaging STANDARDS – standards, [B] – date of manufacture, **A CIGS** (reis) – Manufacturer identification mark, [D] – product line, [E] – make acquainted with the instructions for use, a 117 kolejny numer wersji. Jeżeli oznaczenia wyjaśnione w instrukcji nie są tożsame z oznaczeniami umieszczonymi na wyrobie bądź na opakowaniu, oznacza to, że możez posiadać instrukcję użytkownika do innej partii towaru lub do innego towaru. W przypadku, gdy instrukcja jest nieaktualna lub niewłaściwa do posiadanej partii towaru, należy bezwzględnie pozyskać aktualną/właściwą instrukcję użytkownika i porównać się z jej treścią. **Nie przystępuj do pracy bez zapoznania się z aktualną/właściwą instrukcją użytkownika!**

THIS INSTRUCTION CAN BE COPIED AS NEEDED TO ENABLE EACH USER OF THE PRODUCT TO MAKE ACQUAINTED WITH IT. If case of any doubts, contact a specialist for occupational health and safety at work, the manufacturer or the authorised representative of the manufacturer for clarification.

Legend of the sample labeling: [A] - commodity code, [B] - size, [C] - conformity mark, [D] - before use become familiar with the instruction manual, [E] - manufacturer's identification mark, [F] - ukrainian conformity sign, [G] - conformity sign of the Customs Union, [H] - Great Britain conformity sign, [I] - level of ability, [J] - product line.

Explanation of the used symbols: CODE – commodity code, NUMBER – number of the article, SIZES – available range of sizes, COLOURS – available range of colors, PACKING – quantity of products in the smallest packaging quantity in a cardboard box packaging STANDARDS – standards, [B] – date of manufacture, **A CIGS** (reis) – Manufacturer identification mark, [D] – product line, [E] – make acquainted with the instructions for use, a 117 kolejny numer wersji. RU ИНСТРУКЦИЯ И ИНФОРМАЦИЯ ДЛЯ ПОЛЬЗОВАТЕЛЕЙ

Производитель: RAW-POL Stefański S.K.A., Julianów 50, 96-200 Julianów, Польша.

Этот продукт относится к средствам индивидуальной защиты (СИЗ), определенных в Регулировании Европейского парламента и Совета (ЕС) 2016/425 и отвечает установкам этой а также в Регламенте 2016/425, как это внедрено в британское законодательство с поправками. Был присвоен к I категории – исключительно для минимальных уроз.

Стандарты: EN ISO 21420:2020 “Protective gloves – General requirements and test methods”; Internal technical specification of the manufacturer: RS21301:2018, RS21302:2018, RS21303:2018.

Продукт/описание: Перчатки защитные. Детальная характеристика продукта представлена на rawpol.com

Назначение: Этот продукт является средством личной защиты, предназначенным для защиты пользователя от минимальных утроз, таких как: поверхностные механические травмы, которые не требуют медицинской помощи, например, царапины, вызванные постоянными препятствиями или вызванные во время работы в саду; контакт с горячими поверхностями, не превышающими 50°C (время экспозиции для контакта с горячими поверхностями во время теста составляло 30 секунд); атмосферных условий, которые не имеют экстремального характера, то есть температура холода выше -5°C при средней интенсивности работы. Рабочее время зависит от многих факторов, таких как сила ветра или индивидуальные характеристики пользователя или рабочей среды, поэтому его невозможно точно определить. Более подробную информацию об условиях проведения испытаний можно получить на сайте rawpol.com или непосредственно у производителя, авторизованного представителя производителя или авторизованного дистрибьютора. Исправность согласно EN ISO 21420:2020 – уровень эффективности (от 1 до 5): 3. Уровень исправности был получен на основе испытаний, проведенных в соответствии с условиями, описанными в нормах/спецификации, которые определяют, как продукт будет использоваться. Не используйте поврежденных или изношенных продукт. Продукт обеспечивает защиту от вышеуказанных рисков и предназначен для использования в средах, в которых они происходят. Всегда проводите оценку риска в данной рабочей среде, чтобы проверить, обеспечивает ли продукт защиту от всех рисков, доступных в этой среде и оценить, какие дополнительные средства индивидуальной защиты следует использовать с перчатками для обеспечения оптимального уровня защиты.

Ограничения: Не используйте продукт иначе, чем в соответствии с назначением, рекомендациями в инструкции, в средних условиях и с высоким уровнем риска (для которых целесообразно применять меры по защите отдельных категорий
