EN Manufacturer: RAW-POL STEFANŃSKI S.K.A., Julianów 50, 96-200 Julianów, Poland.

This product belongs to the Personal Protective Equipment (PPE), defined in the Regulation (EU) 2016/425 of the European Parliament and of the Council and meets the guidelines of that regulation and the PPE Regulation 2016/425 as brought into UK law and amended. It was classified to category I – only for the minimal risks.

**Standards:** EN ISO 13688:2013+A1:2021 „Protective clothing. General requirements“; EN ISO 12947-2:2016 „Textiles. Determination of the abrasion resistance of fabrics by the Martindale method. Part 2: Determination of specimen break down“; Internal technical specification of the manufacturer: RS22301:2018, RS22302:2018.

**Product/description:** Protective clothing. Detailed characterisation of the product is provided in rawpol.com.

**Intended use:** Protection against the following minimal risks: superficial mechanical injury that do not need medical attention, e.g. scratches resulting from bumping into fixed obstacles and gardening; contact with hot surfaces not exceeding 50°C (the time of exposure to the contact with hot surfaces during the test was 30 seconds). The level of protection was obtained on the basis of tests carried out according to conditions described in the norms/specifications to which they apply. The product provides protection against the above risks and it is intended for use in the environments in which they occur. Please always carry out a risk assessment in a given work environment to verify whether the product provides protection against all risks available in this environment.

**Restrictions:** Do not use the product other than in accordance with the intended purpose, recommendations in the instruction, in average conditions and high-risk (for which it is appropriate to apply measures to protect individual category II and III) and when the type of work is related to the risk of the product being caught up by moving objects, e.g. moving parts of machines and such PPE being caught is associated with a health or safety hazard. This product does not protect parts of the body, which it does not cover. Protection against risks and dangers not mentioned in the instructions is not guaranteed.

**Use and operation:** This product is personal protection of simple design, the operation efficiency level of which in relation to minimal risks can be assessed by the user. The personal liability of the user is determined to ensure protective function of the product. This product is intended to be worn. This product must be put on the body. If the product has any fasteners, they need to be fastened/zippered. If the product has components to tie, they need to be tied. It should be noted that the product lies comfortably and gives freedom of movement (to do this, match all kinds of adjustments, if any). In order to remove the product, first untie/unzip all previously fastened/zippered elements and untie previously tied elements, if any. If the product is worn together with other individual protection equipment, note that total protective functions depending on the intended use are guaranteed. In any event, requirements shall take precedence. Before use, the use shall check, on his/her own responsibility, that the product is suitable to the operations, is complete and whether all protective functions are guaranteed. Check whether there are any damages, which could have a negative impact on safety features (e.g. cracks, holes, broken seams, damaged fasteners, abrasions). If there is such a negative impact, before use, return to the original good condition of the product (to do this, contact the manufacturer or the authorised representative of the manufacturer), and if this is not possible, it must be replaced. When operation, pay attention to keep protective functions. Lost protection means that the product has been worn. Do not use a damaged or worn out product. The product does not have additional equipment and spare parts.

Materials used to make the product, should not adversely affect the user's hygiene or health. However, any substance contained in the material of the product or being a component of the product can be allergen, such as cotton, leather, metal parts, latex, stains, etc. It is recommended that sensitive persons test the product or seek for medical advice before use.

**Size:** The product should be of sufficient size, which must be adjusted before starting operation. The product size is provided directly on the product or on internal label or on packaging. Available size range is specified in the field SIZES. Full size range is provided in the tables available on rawpol.com

**Cleaning, maintenance and disinfection:** Recommendations for maintenance, cleaning are provided on the label of the product. It is recommended to use generally commercially available cleaners, preservatives for each type of material, which does not have negative impact on the user's body. The products, which do not have sewn-in the maintenance, cleaning label, must only be cleaned with damp, soft cloth, dry flat.

It is not recommended to use any additional methods for disinfection and disinfectants, as this may have impact on reducing levels of protection.

The pictograms for maintenance, cleaning with an explanation:
 - wash in temp. to 40°C,
 - do not bleach / chlorine,
 - do not tumble dry,
 - Ironing temperature 110°C,
 - Do not dry clean.

**Storage:** The product should be stored at the appropriate temperature, in dry and well ventilated place. Too high humidity of air, too high or low temperature or intense light can adversely impact the product quality. Manufacturer accepts no liability for the quality of the product stored contrary to the instructions. This may result in a lowering of the product protection level.

**Type of packaging:** It is recommended to distribute (including transport) the product in the package with cardboard or plastic film. Loading, transport and unloading should take place in environment protecting against splashes, dirt and damage.

**Product durability** can be estimated on the basis of the product wear and tear. Considering various use intensities and environmental factors, such as sunlight, rain, etc., it is not possible to provide a precise span. The product retains its protective properties up to the moment of a damage which cannot be repaired without decreasing its protective level. Occurrence of mechanical damages means that the product should be repaired or immediately withdrawn from use. With proper warehousing the storage time of the product can be up to 10 years from the date of production (in the case of clothing containing polyurethane up to 6 years).

**Date of manufacture** is indicated on the packaging of the product. This is with the batch number, e.g. **290120191234**; explanation: the third and fourth digits indicate month of manufacturing, and the subsequent four digits identify year of manufacturing. Other digits together with the above identify the number of batch.

**The access to the EU declaration of conformity can be accessed at support.rawpol.com.** In the event that this manual is out-of-date because of changes in law or other factors, downward the new version. Current instructions are available on the rawpol.com or support.rawpol.com. This manual is marked with version v.B.C1C.112, where B.C1C is the identifier of product group and 112 the subsequent version number. If the labels explained herein are not the same as labels on the product or on the packaging, this means that the manual is for other batch or other product. If the manual is out-of-date or inappropriate to the batch, it is essential to obtain current/ appropriate manual and refer to its contents. **Do not start operation without reading information included in the current/correct operation manual!**

THIS MANUAL CAN BE REPEATEDLY COPIED IN ORDER ANY USER CAN READ THE INFORMATION INCLUDED HEREIN. In any doubts please contact with safety expert, the manufacturer or the authorized representative of the manufacturer in order to explain them.

**Explanation of used symbols:** CODE – commodity product code, SIZES – available sizes, COLOURS – available colour range, PACKAGING – quantity of the product in the smallest packaging/quantity in the carton, STANDARDS – standards, [B] – product line, [C] – batch code, [d] – date of manufacture, **†** **†** (reis) – manufacturer's identification mark, [B] – refer to the operational manual, [D] – online information, C€ – conformity mark, III - conformity sign of the Customs Union, [€ - ukrainian conformity sign, [B - Great Britain conformity sign

This manual is an integral part of the package, and at the same time its marking. In accordance with the Regulation (EU) 2016/425 of the European Parliament and of the Council article 17 paragraph 1, all the markings may not be placed on the product. The signs description in the instruction is binding information, also in the case if there were factors that led to that the signs on the product are unreadable. Any non-explained signs in this manual do not refer directly or indirectly to health and safety. The product and its packaging must be disposed in accordance with applicable local regulations. Information on the composition of the product and its packaging is available on rawpol.com.

**Restrictions:** Do not use the product other than in accordance with the intended purpose, recommendations in the instruction, in average conditions and high-risk (for which it is appropriate to apply measures to protect individual category II and III) and when the type of work is related to the risk of the product being caught up by moving objects, e.g. moving parts of machines and such PPE being caught is associated with a health or safety hazard. This product does not protect parts of the body, which it does not cover. Protection against risks and dangers not mentioned in the instructions is not guaranteed.

**Use and operation:** This product is personal protection of simple design, the operation efficiency level of which in relation to minimal risks can be assessed by the user. The personal liability of the user is determined to ensure protective function of the product. This product is intended to be worn. This product must be put on the body. If the product has any fasteners, they need to be fastened/zippered. If the product has components to tie, they need to be tied. It should be noted that the product lies comfortably and gives freedom of movement (to do this, match all kinds of adjustments, if any). In order to remove the product, first untie/unzip all previously fastened/zippered elements and untie previously tied elements, if any. If the product is worn together with other individual protection equipment, note that total protective functions depending on the intended use are guaranteed. In any event, requirements shall take precedence. Before use, the use shall check, on his/her own responsibility, that the product is suitable to the operations, is complete and whether all protective functions are guaranteed. Check whether there are any damages, which could have a negative impact on safety features (e.g. cracks, holes, broken seams, damaged fasteners, abrasions). If there is such a negative impact, before use, return to the original good condition of the product (to do this, contact the manufacturer or the authorised representative of the manufacturer), and if this is not possible, it must be replaced. When operation, pay attention to keep protective functions. Lost protection means that the product has been worn. Do not use a damaged or worn out product. The product does not have additional equipment and spare parts.

Materials used to make the product, should not adversely affect the user's hygiene or health. However, any substance contained in the material of the product or being a component of the product can be allergen, such as cotton, leather, metal parts, latex, stains, etc. It is recommended that sensitive persons test the product or seek for medical advice before use.

**Size:** The product should be of sufficient size, which must be adjusted before starting operation. The product size is provided directly on the product or on internal label or on packaging. Available size range is specified in the field SIZES. Full size range is provided in the tables available on rawpol.com

**Cleaning, maintenance and disinfection:** Recommendations for maintenance, cleaning are provided on the label of the product. It is recommended to use generally commercially available cleaners, preservatives for each type of material, which does not have negative impact on the user's body. The products, which do not have sewn-in the maintenance, cleaning label, must only be cleaned with damp, soft cloth, dry flat.

It is not recommended to use any additional methods for disinfection and disinfectants, as this may have impact on reducing levels of protection.

The pictograms for maintenance, cleaning with an explanation:
 - wash in temp. to 40°C,
 - do not bleach / chlorine,
 - do not tumble dry,
 - Ironing temperature 110°C,
 - Do not dry clean.

**Storage:** The product should be stored at the appropriate temperature, in dry and well ventilated place. Too high humidity of air, too high or low temperature or intense light can adversely impact the product quality. Manufacturer accepts no liability for the quality of the product stored contrary to the instructions. This may result in a lowering of the product protection level.

**Type of packaging:** It is recommended to distribute (including transport) the product in the package with cardboard or plastic film. Loading, transport and unloading should take place in environment protecting against splashes, dirt and damage.

**Product durability** can be estimated on the basis of the product wear and tear. Considering various use intensities and environmental factors, such as sunlight, rain, etc., it is not possible to provide a precise span. The product retains its protective properties up to the moment of a damage which cannot be repaired without decreasing its protective level. Occurrence of mechanical damages means that the product should be repaired or immediately withdrawn from use. With proper warehousing the storage time of the product can be up to 10 years from the date of production (in the case of clothing containing polyurethane up to 6 years).

**Date of manufacture** is indicated on the packaging of the product. This is with the batch number, e.g. **290120191234**; explanation: the third and fourth digits indicate month of manufacturing, and the subsequent four digits identify year of manufacturing. Other digits together with the above identify the number of batch.

**The access to the EU declaration of conformity can be accessed at support.rawpol.com.** In the event that this manual is out-of-date because of changes in law or other factors, downward the new version. Current instructions are available on the rawpol.com or support.rawpol.com. This manual is marked with version v.B.C1C.112, where B.C1C is the identifier of product group and 112 the subsequent version number. If the labels explained herein are not the same as labels on the product or on the packaging, this means that the manual is for other batch or other product. If the manual is out-of-date or inappropriate to the batch, it is essential to obtain current/ appropriate manual and refer to its contents. **Do not start operation without reading information included in the current/correct operation manual!**

THIS MANUAL CAN BE REPEATEDLY COPIED IN ORDER ANY USER CAN READ THE INFORMATION INCLUDED HEREIN. In any doubts please contact with safety expert, the manufacturer or the authorized representative of the manufacturer in order to explain them.

**Explanation of used symbols:** CODE – commodity product code, SIZES – available sizes, COLOURS – available colour range, PACKAGING – quantity of the product in the smallest packaging/quantity in the carton, STANDARDS – standards, [B] – product line, [C] – batch code, [d] – date of manufacture, **†** **†** (reis) – manufacturer's identification mark, [B] – refer to the operational manual, [D] – online information, C€ – conformity mark, III - conformity sign of the Customs Union, [€ - ukrainian conformity sign, [B - Great Britain conformity sign

This manual is an integral part of the package, and at the same time its marking. In accordance with the Regulation (EU) 2016/425 of the European Parliament and of the Council article 17 paragraph 1, all the markings may not be placed on the product. Any non-explained signs in this manual do not refer directly or indirectly to health and safety. The product and its packaging must be disposed in accordance with applicable local regulations. Information on the composition of the product and its packaging is available on rawpol.com.

EN **INSTRUCTION AND INFORMATION FOR THE USERS**

**Manufacturer:** RAW-POL STEFANŃSKI S.K.A., Julianów 50, 96-200 Julianów, Poland.

This product belongs to the Personal Protective Equipment (PPE), defined in the Regulation (EU) 2016/425 of the European Parliament and of the Council and meets the guidelines of that regulation and the PPE Regulation 2016/425 as brought into UK law and amended. It was classified to category I – only for the minimal risks.

**Standards:** EN ISO 13688:2013+A1:2021 „Protective clothing. General requirements“; EN ISO 12947-2:2016 „Textiles. Determination of the abrasion resistance of fabrics by the Martindale method. Part 2: Determination of specimen break down“; Internal technical specification of the manufacturer: RS22301:2018, RS22302:2018.

**Product/description:** Protective clothing. Detailed characterisation of the product is provided in rawpol.com.

**Intended use:** Protection against the following minimal risks: superficial mechanical injury that do not need medical attention, e.g. scratches resulting from bumping into fixed obstacles and gardening; contact with hot surfaces not exceeding 50°C (the time of exposure to the contact with hot surfaces during the test was 30 seconds). The level of protection was obtained on the basis of tests carried out according to conditions described in the norms/specifications to which they apply. The product provides protection against the above risks and it is intended for use in the environments in which they occur. Please always carry out a risk assessment in a given work environment to verify whether the product provides protection against all risks available in this environment.

**Restrictions:** Do not use the product other than in accordance with the intended purpose, recommendations in the instruction, in average conditions and high-risk (for which it is appropriate to apply measures to protect individual category II and III) and when the type of work is related to the risk of the product being caught up by moving objects, e.g. moving parts of machines and such PPE being caught is associated with a health or safety hazard.
