PRODUCT NAME:

Welder face shield with oculars and automatic welding filters

Schweisser-gesichtsschild mit okularen und automatischem schweissfilter

Przyłbica spawalnicza z szybkami ochronnymi i filtrem automatycznym

EN ISO 16321-1:2022 EN ISO 16321-2:2021 EN 379:2003 + A1:2009
EN 61000-6-3:2007+A1:2011 EN 61000-6-1:2019

RAW-POL, 96-200 Julianów, 50, Polska

The member of REIS GROUP

v. G.OTDA.107

Materials from which the product has been made should not have any negative influence on the user's health or hygiene. However, it is warned that any substance forming the product or constituting its component may have allergenic properties, e.g. cotton, leather, metal elements, latex, pigments etc. In sensitive individuals, it is recommended to test the product before usage or consult a doctor.

Cleaning, maintenance and disinfection: Welder face shield, oculars and filter should be cleaned with gentle, lint-free material or cotton cloth. Abrasive materials, solvents or oil-based cleaning agents should not be used. Minimum once every month, the disinfection of all parts having contact with the user's body is recommended, however, the frequency should be adapted to the conditions of the working environment and to the internal guidelines and applicable legal regulations. It should be performed with common disinfection agents. The cleaners used for cleaning, maintenance and disinfection cannot have negative impact the user's body. Do not immerse the filter in water. Protect the filter against the exposure to liquids and pollution. Clean the filter's surface regularly (should be remembered to remove the front protective ocular in order to wipe the filter surface), do not use strong cleaning solvents. Always keep the sensors and solar cells clean. Do not cover the sensors. Replace scratched/damaged oculars and filter regularly. The textile part of the headgear should be cleaned regularly. To do this, first unhook it from the hooks, remove it from the headband and wipe it with a soft, lint-free cloth or a cotton cloth. After cleaning and airing out, put it on the headband and attach it to the catches. If the user does not follow the abovementioned instructions and/or the product's instruction for use, serious injuries may occur.

Storage: The product should be stored in a protective packaging at the appropriate temperature, in a clean, dry, dust-free and well ventilated environment, out of direct sunlight, away from chemicals and abrasive substances. Too high humidity of air, too high or low temperature or intense light can adversely impact the product quality. The shield needs to be stored in a position to prevent it from scratching or damaging. Filter is a part which requires special attention – it should not have contact with surrounding objects. The Manufacturer shall not be responsible for the quality of a product stored contrary to the instructions. This may result in a lowering of the product protection level.

Package type: The product is intended for distribution (including transport) in cardboard or film package. Fragile products should be additionally protected against damage. Loading, transport and unloading should take place in environment protecting against splashes, dirt and damage.

Shelf life: It can be assessed basing on the product's wear. Due to different levels of usage intensity as well as environmental factors such as sunlight, rain etc., it is impossible to provide a specific date. The product preserves its protective properties until the occurrence of damage which cannot be eliminated without negatively affecting the level of protection. Occurrence of mechanical damages means that the product should be repaired (for this purpose please contact with safety expert, the manufacturer or the authorized representative of the manufacturer), and if this is not possible, immediately withdraw from use and replace it. With proper warehousing the storage time of the product can be up to 5 years from the date of production.

Date of production: It is on the product (figure 1). The arrow indicates the month of production, the year means two digits in the middle.

Marking: 4/9-13 1/1/2/379 CE - filter marking (4 - number of bright shade, 9 - number of the brightest dark shade, 13 - number of the darkest shade, 1 - optical class, 1 - light diffusion class, 1 - class of the variation of light transmission coefficient, 2 - class of light transmission coefficient dependence on the angle, 379 - norm number); 1 CE - inner glass marking (1 - enhanced optical performance);

1 CE - outer glass marking (1 - enhanced optical performance); 16321-2:2021, W14 C 1-M CE RAW-POL STEFANSKI S.K.A., Julianów 50, 96-200 Julianów, Poland - frame marking (W14 - shade number, C - impact level C, 1-M - head form size) CODE - commodity product code/model identification number; COLOURS - available colour range; PACKING - quantity of the product in the smallest packaging/quantity in the carton; STANDARDS - standards; (reis) - manufacturer's identification mark; EN ISO 16321-1, EN ISO 16321-2, EN379, EN61000-6-3, EN61000-6-1 - European standard numbers; C - impact level C (impact resistance of a steel ball with a nominal diameter 6 mm, minimum weight 0,86 g and estimated speed 45 m/s); - make acquainted with the instructions for use; - batch code; - online instruction; CE - conformity mark; - symbol of selective collection.

ATTENTION! Manufacturer is not responsible for defects and damages resulting from modifications of the shield, usage of the filter in a shield different than the original one as well as from the usage for other purposes than intended. Modification of the shield may result in the reduction or complete elimination of the welder's protection. The shield DOES NOT PROTECT against strong impacts, for example fragments of grinding wheel, explosions or exposure to chemical products. Protection against the hazards mentioned must be ensured by appropriate protective equipment. Using the shield with the oculars or the filter removed may result in trauma and injury of sight and face. For automatic welding filters with manual scale number setting, the maximum and minimum protection level is achieved by choosing the "zero" option. Detailed information about individual parts of the product can be obtained from the manufacturer or an authorized representative of the manufacturer.

WARNING! It is forbidden to put the shield away on hot surface! The shield must not be exposed to direct and prolonged solar radiation! Protectors that have been subject to impact shall not be used and shall be discarded and replaced. Toughened mineral filters should be used exclusively with appropriate internal glass. If the impact level symbols are not equal on both the lens/filter and the frame, then it is the lower level that shall be assigned to the complete protector. The protections corresponding to the code numbers/letter 7 (radiant heat), 9 (molten metals and hot solids), CH (chemical resistance) are provided by the complete protector only if the respective symbols are equal on both the lens and the frame. Eye protection equipment protecting against the impact of high speed particles used together with standard correction glasses may transfer the impact, causing a risk for the user. If the protection against the impact of high speed particles at extreme temperatures is necessary, eye protection equipment chosen should be labeled with the letter T, preceded by the letter defining the symbol of impact, i.e. CT, DT or ET. If the letter T is not immediately preceded by the letter defining the symbol of impact, the equipment can be used exclusively for protection against high speed particles at room temperature. Shield and filter/ocular are not intended for overhead

INSTRUCTION AND INFORMATION FOR THE USERS

Manufacturer: RAW-POL STEFANSKI S.K.A., Julianów 50, 96-200 Julianów, Poland, idok@rawpol.com. This product belongs to the Personal Protective Equipment (PPE), defined in the Regulation (EU) 2016/425 of the European Parliament and of the Council and meets the guidelines of that regulation. It has been assigned to the II category. This product meets the guidelines of Directive 2011/65/EU of the European Parliament and of the Council on the restriction of the use of certain hazardous substances in electrical and electronic equipment, as well as the guidelines of Directive 2014/30/EU of the European Parliament and of the Council on the harmonisation of the laws of the Member States relating to electromagnetic compatibility.

Standards: EN ISO 16321-1:2022 „Eye and face protection for occupational use. Part 1: General requirements”; EN ISO 16321-2:2021 „Eye and face protection for occupational use. Part 2: Additional requirements for protectors used during welding and related techniques”; EN 379:2003 + A1:2009 „Personal eyes protection. Automatic welding filters”; EN 61000-6-3:2007+A1:2011 „Electromagnetic compatibility (EMC) - Part 6-3: Generic standards - Emission standard for residential, commercial and light industrial environments”; EN 61000-6-1:2019 „Electromagnetic compatibility (EMC) - Part 6-1: Generic standards - Immunity standard for residential, commercial and light-industrial environments”.

The notified body: DIN CERTCO Gesellschaft für Konformitätsbewertung mbH, Alboinstraße 56, 12103 Berlin, Germany, number of the body: 0196.

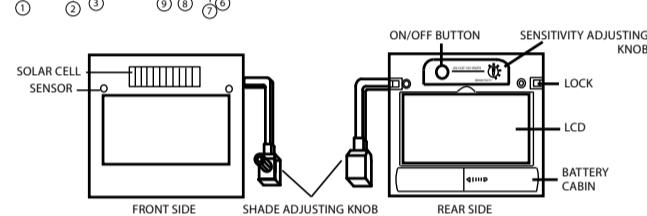

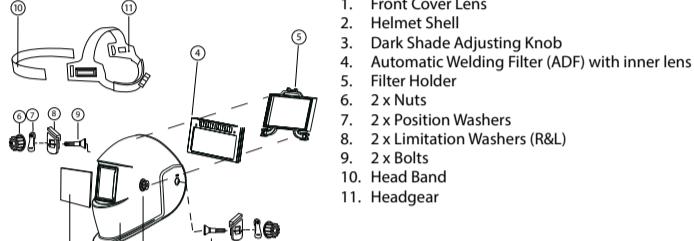

Product/description: Welder face shield with oculars and automatic welding filters. Detailed characteristics of the product is provided at the address: rawpol.com

Intended use: Face shield is intended to protect the sight and part of the face during the welding process. The shield should only be used to protect the eyes and face against harmful optical radiation and other specific sources of risk or hazard, usually occurring during welding, cutting, or related operations. During the welding process, it must cover the user's eyes and face in a way to ensure appropriate visibility of the welded object and protection against harmful radiation. The level of protection was obtained on the basis of tests carried out according to conditions described in the norms / specifications to which they apply. The product provides protection against the above risks and it is intended for use in the environments in which they occur. Please always carry out a risk assessment in a given work environment to verify whether the product provides protection against all risks available in this environment.

Restrictions: It is cautioned against using the product incorrectly, instructions and high-risk conditions (where the PPE of III category are appropriate) and when the type of work is related to the risk of the product being caught up by moving objects, e.g. moving parts of machines and such PPE being caught is associated with a health or safety hazard. The protection against hazards and dangers not listed in the manual is not guaranteed.

Use and handling: Before use, it is necessary to verify if the front protective ocular and backing ocular and filter are assembled in an appropriate way. Check whether oculars and filter are clean and without any damage. Verify if the shield is not excessively used or damaged. Any used, damaged or defective parts need to be replaced before usage, and if it is not possible the whole product has to be replaced.

Assembly:

Operation:

- Before starting the work, take up the welder's face shield, gently press the ON/OFF button on the auto-darkening welding filter to power on.
- Setting correct dark shade by turning the dark shade adjusting knob according to the welding.
- Put on the shield. Welder's face shield needs to be placed on the user's head, then, by turning the framing's bolt, adjusted to its circumference and height in order to be placed on the head in a stable and comfortable manner, without the risk of excessive squeezing or slipping off.
- Start your welding work and the filter will turn to intended dark shade state you had set immediately. If it fails, stop welding at once and check it out. Make sure you have overcome the problem before try again.
- Power AUTO-OFF when finish welding.

welding, laser welding and laser cutting. It is forbidden to open and manipulate within the auto-darkening filter. The shield does not protect against the equipment causing the risk of explosion or against corrosive liquids. Do not perform any modifying actions in the shield or filter on your own, unless described in the present instruction. Leave the workplace immediately when feel dizzy or allergic caused the damage of the welding helmet. If the shield does not darken during arc ignition, welding must be stopped immediately and the cause of fault needs to be detected. It is necessary to check whether the problem has been solved before restarting the welding process. This protector is appropriate for the headform 1-M. Not suitable for driving and road use.

The access to the EU declaration of conformity can be accessed at support.rawpol.com.

In case this instruction becomes invalid due to the changing law or other factors, new version should be downloaded. Valid instructions are available on the website rawpol.com or support.rawpol.com. This instruction is marked with the version number v. G.OTDA.107, where G.OTDA indicates the item group identifier and 107 corresponds to the subsequent version number. If markings explained in the instructions are not the same as marked on the product or on the packaging, it means that you can have the instruction for use for another lot or another good. In case the instruction is out of date or improper to the owned lot of goods, it must be strictly obtained the current / proper instruction for use and become familiar with its content. **Do not attempt to work without becoming familiar with the current / proper instruction for use!**

THE PRESENT INSTRUCTION MAY BE COPIED NUMEROUS TIMES IN ORDER TO SERVE AS A REFERENCE FOR EVERY USER OF THE PRODUCT.

In any doubts, please contact with safety expert, the manufacturer or the authorized representative of the manufacturer in order to explain them.

This manual is an integral part of the package, and at the same time its marking. In accordance with the Regulation (EU) 2016/425 of the European Parliament and of the Council article 17 paragraph 1, all the markings may not be placed on the product. The signs description in the instruction is binding information, also in the case if there were factors that led to that the signs on the product are unreadable. Any non-explained signs in this manual do not refer directly or indirectly to health and safety. The product and its packaging must be disposed in accordance with applicable local regulations. Information on the composition of the product and its packaging is available on rawpol.com.

ANLEITUNG UND INFORMATIONEN FÜR DIE BENUTZER

Hersteller: RAW-POL STEFANSKI S.K.A., Julianów 50, 96-200 Julianów, Polen, idok@rawpol.com. Dieses Produkt gehört zur persönlichen Schutzausrüstung (PSA), die in der Verordnung (EU) 2016/425 des Europäischen Parlaments und des Rates und erfüllt die Anforderungen dieser Verordnung. Es wurde der Kategorie II zugeordnet. Das Produkt erfüllt die Anforderungen der Richtlinie 2011/65/EU des Europäischen Parlaments und des Rates zur Beschränkung der Verwendung bestimmter gefährlicher Stoffe in Elektro- und Elektronikgeräten, ebenso gut wie Richtlinie 2014/30/EU des Europäischen Parlaments und des Rates zur Harmonisierung der Rechtsvorschriften der Mitgliedstaaten über die elektromagnetische Verträglichkeit.

Standards: EN ISO 16321-1:2022 „Augen- und Gesichtsschutz für berufliche Anwendungen. Teil 1: Allgemeine Anforderungen“; EN ISO 16321-2:2021 „Augen- und Gesichtsschutz für berufliche Anwendungen. Teil 2: Zusätzliche Anforderungen und Schutzgeräte, die während des Schweißens und verwandten Verfahren verwendet werden.“; EN 379:2003 + A1:2009 „Persönlicher Augenschutz. Automatische Schweißfilter“. EN 61000-6-3:2007+A1:2011 „Elektromagnetische Verträglichkeit (EMV) - Teil 6-3: Allgemeine Standards - Emissionsnorm für Wohn-, Gewerbe- und Leichtindustrieumgebungen“; EN 61000-6-1:2019 „Elektromagnetische Verträglichkeit (EMV) - Teil 6-1: Allgemeine Standard - Störfestigkeit in Wohn-, Gewerbe- und Leichtindustrieumgebungen“.

Notifizierte Stelle: DIN CERTCO Gesellschaft für Konformitätsbewertung mbH, Alboinstraße 56, 12103 Berlin, Germany, Nummer der Stelle: 0196.

Produkt/Beschreibung: Schweisser-gesichtsschild mit okularen und automatischem schweissfilter. Detaillierte Eigenschaften des Produkts sind unter rawpol.com erhältlich.

Anwendung: Der Gesichtsschild wurde entwickelt, um die Augen und Teile der Stirn während des Schweißprozesses zu schützen. Der Gesichtsschild sollte nur verwendet werden, um Augen und Gesicht vor schädlicher optischer Strahlung und anderen spezifischen Gefahrenquellen oder Gefahrenquellen zu schützen, die normalerweise beim Schweißen, Schneiden oder ähnlichen Arbeiten auftreten. Während des Schweißprozesses muss der Schweißerschutz die Augen und das Gesicht des Benutzers so absichern, dass eine ausreichende Sichtbarkeit des zu verschweißenden Werkstücks und ein Schutz vor schädlicher Strahlung gewährleistet ist. Das Schutzniveau wurde durch die Durchführung von Prüfungen gemäß den in den Normen/Spezifikationen, auf die sie sich beziehen, beschriebenen Bedingungen erreicht. Dieses Produkt bietet Schutz vor den oben genannten Gefahren und ist für den Einsatz in Umgebungen vorgesehen, in denen sie auftreten. Führen Sie immer eine Risikobewertung in der Arbeitsumgebung durch, um sicherzustellen, dass das Produkt Schutz vor allen Gefahren in dieser Umgebung bietet.

Begrenzungen: Verwenden Sie das Produkt nicht anders als in Übereinstimmung mit dem beabsichtigten Zweck, Empfehlungen in der Anweisung, in durchschnittlichen Bedingungen und mit hohem Risiko (für die es angemessen ist, Maßnahmen zum Schutz der einzelnen Kategorie III anzuwenden) und wenn die Art der Arbeit mit dem Risiko des Verhakens des Produkts mit sich bewegenden Objekten verbunden ist, beispielsweise beweglichen Teilen von Maschinen, die mit einer Gesundheits- oder Sicherheitsgefährdung verbunden sind. Der Schutz gegen Bedrohung und Gefahren, die nicht in der Anleitung erwähnt werden, ist nicht garantiert.

Verwendung: Überprüfen Sie vor Gebrauch, ob die Vorsatzscheibe und die Hinterlegschichtscheibe sicher festgelegt sind. Überprüfen Sie, ob die Sichtscheiben und der Filter sauber und unbeschädigt sind. Überprüfen Sie, ob der Gesichtsschild nicht übermäßig abgenutzt oder beschädigt ist. Verschlissene, beschädigte oder defekte Teile sind vor der Verwendung zu ersetzen, oder, wenn dies nicht möglich ist, das gesamte Produkt.

Montage:

6. After work, the welder's face shield should be taken off.

CATION: Batteries should be removed when long time off use.

WARNING: Whenever the welder's face shield is off use and/or stored, always keep it with filter sensors downward. Otherwise may cause batteries used up earlier.

Sensitivity control: The sensitivity control is used to make the filter more responsive to different light levels experienced in various welding processes. We recommend a Mid-Range or 30-50% sensitivity setting for most applications.

It may be necessary to adjust helmet sensitivity to accommodate different lighting conditions or if filter is flashing On and Off. Adjust the sensitivity as follows:

- Turn sensitivity control to lowest setting.
- Face the welder's face shield in the direction of use, exposing it to the surrounding light conditions.
- Gradually turn sensitivity setting clockwise until the lens darkens, then turn sensitivity control counterclockwise until slightly past setting where lens clears. Shield is ready for use. Slight readjustment may be necessary for certain applications or if filter is flashing on and off.

Replacement of replaceable parts:

Replacing the front protective ocular if it is damaged (cracked, scratched, soiled or pitted):

- Lift the front protective ocular from bottom side with one finger, remove it by draw out side.
- First bend the new cover plate and insert one side of the plate into the cover plate security slot and then the opposite side.
- Press the cover plate to fit well.

The welder's face shield can be used with O-PL-AUTOSHIELD protective visor. Before using the protective visor, read the instruction provided with the product.

The other parts of the welding helmet are not replaceable.

Trouble shooting:

- If the auto-darkening speed and shade state level decrease, the batteries are low. Replace the batteries.
- If the filter will not lighten or become clear, either power switch is OFF or batteries are low. Turn on the switch or replace batteries.
- When the light transmittance of the protective sheet in front of the filter is low, replace with a new one.

Specifications:

Viewing window area: 90X
