If there is such a negative impact, before using, restore the original valid status of the product (to do this, contact the manufacturer or the authorised representative of the manufacturer), and if this is not possible, replace it. While working, pay attention to keep the protective functions. Loss of the protective functions means that the product has been worn. Do not use a damaged or worn out product. The product permanently discoloured or permanently soiled must be replaced. While wearing, the reflective belts must be on the outside. If the product is worn together with other means of personal protection, total protection features must be guaranteed depending on this precedence. Before using, the user checks on his/her own responsibility, whether the product is suitable for working activities, is complete, clean, not faded, and whether all functions are guaranteed. Check the damages, whether they could have a negative impact on the safety functions (e.g. cracks, holes, ripped seams, broken prongs, worn reflective belts).
